

LITHOLOGIC LOG

Testhole B

Description of Lithology	Depth (ft)	
	From	To
Laterite soil and limestone fragments	0	1
Limestone, white to light gray, very well cemented, slightly clayey	1	20
Limestone, light tan to white, moderately cemented, medium-grained clayey	20	30
Limestone, white and light tan to gray, well cemented, slightly clayey; moldic porosity of about ten percent	30	50
Limestone, white, very well cemented, fine-grained, massive	50	150
Limestone, white, very well cemented; coarse cuttings; vuggy porosity of 20 percent	150	180
No cutting return	180	300
Limestone, white to light yellow, very well cemented, fine-grained; porosity of 15 percent	300	330
No cutting return	330	350
